Just finished listening to Day 5 - another wonderful experience. Over the last 5 days, I have been much happier, acting silly, listening to music; just virtually stress free. Overall, a great learning & experiential investment of time.

Skeptical as I am, I have to admit, something did shift. I woke up after having a great night's sleep. My creativity was triggered and my mind filled with interesting ideas and ways to better my life and my relationships. Due to severe heart break, my creative juices became nonexistent for quite some time. Could my creative juices be back flowing in full force because of your Holosync audios?

Day 2 was so relaxing. I cannot believe how much this is affecting my brain!! Where only two days ago I was so full of anger, doubt, fear and hopelessness, at least now, today and yesterday, I feel like I can cope so much better. Not only feel like but actually am coping so much better with my situation at home. I feel like a weight has been lifted.
